

Spirit Digital Privacy Notice

Spirit Digital works with its healthcare customers, including Commissioners and Clinicians, to implement forward-thinking care models that extend care access, improve quality and lower the cost of care. Through these proven models, Spirit Digital helps enable healthcare systems to extend high quality care to patients throughout their journey across the care spectrum.

Our product is called Clinitouch Vie, this is a digital health service which helps people to stay at home supporting them in better self-management and to receive the right interventions at the right time. As well as empowering individuals in understanding their condition, it allows for remote clinical monitoring of medical conditions by healthcare professionals providing an early notification of deterioration. This allows clinicians to review patients as regularly as they like without making more house visits, improving quality of life and avoiding hospital admissions.
